ATC participates in eHealth Forum 2017

Athens Technology Center (ATC) is participating in the **eHealth Forum 2017**, an international event dedicated to promoting digital health, and will showcase the latest developments in the **m-Resist**, **City4Age**, **BD2Decide** and **EVOTION**, research projects, all the EU-funded within the wider scope of the **digital transformation of health area**. ATC, a founding member of the Big Data Value Association (BDVA) and a true advocate of focused research, is actively involved in these 4 projects through its Innovation Lab, offering its extensive experience in mobile application development technologies, big data and IoT solutions. The event will take place on 19-24 October 2017 in Technopolis of the Municipality of Athens.

At the implementation level, the common site of the 4 projects is the formation of big data analysis and visualization platforms. **m-Resist** focuses on the needs of patients with treatment-resistant schizophrenia, studying new therapeutic protocols and disease management methods based on mobile technologies. Similarly, **City4Age** is exploring the effective use of "intelligent" and IoT technologies to ensure a healthy ageing and independent living for older people. In addition, **BD2Decide** focuses on developing new prognostic models for the appropriate treatment of head and neck cancer cases, while **EVOTION** aims to support decision making and shaping of holistic public health policies for hearing impaired people.

Athens Technology Center (ATC) designs, provide and support novel, end to end IT solutions for all business functions, on time and on budget, both on premise and in the cloud. The company maintains an active presence in the EU, the Balkans, Central Europe, Middle East and North Africa for over 30 years. In order to enable digital transformation of independent enterprises and public organizations, ATC focuses on the fields of Data/Content Management and Analysis, Enterprise Management, Human Capital Management and of Mobile Computing. ATC's Innovation Lab collaborates closely with distinct academic and research institutions and major leaders of global ICT sector.
