

Mobile Therapeutic Attention for Patients with Treatment Resistant Schizophrenia

ISSUES TO BE ADDRESSED

Standard treatment is not sufficient enough
Find new means of treating this severe brain disorder which cause marked impairments in social, occupational, and cognitive functioning

THE m-RESIST

The innovative disease management system consists of different parts of development

Designing and developing the m-RESIST system.

Designing the m-RESIST program (services, care pathways or health routes)

STEP BYSTEP

Testing the m-RESIST system & program on healthy volunteers, patients and caregivers

Promoting the active role of patients, caregivers, clinicians in the design & assessment of the m-RESIST program & tools

Creating a predictive model to identify risks & gaps in the treatments enabling the prescription of personalized treatment & tools for patients
